55 Islander Road Pialba QLD 4655

Description

Mercury 1350 Racing Sterndrive - Mercury Racing has led the world of high-performance boating with engines that epitomize power and speed for more than 70 years. Since the day Mercury Racing was founded, we've committed ourselves to the art of innovation. Today, We're proud to introduce an engine that is the culmination of everything we've ever learned. Introducing the 1350, Mercury Racing's most powerful, durable, and efficient engine yet. The first sterndrive engine package ever fully designed in-house — from block to prop — by Mercury Racing engineers, the 1350 delivers an on-water experience that will drive you farther and longer than ever before. This isn't merely an engine. This is history in the making. This is a watershed.

ZERO EFFORT® DIGITAL CONTROL

- The newly designed, ergonomic Zero Effort Digital Control delivers precision that makes throttling effortless. Utilizing the Propulsion Control Module (PCM) microprocessor - the brain behind the engine's brawn - we achieved a seamless integration for optimal control. From the SmartCraft® Digital Throttle & Shift to the Engine Guardian® System, Mercury Racing's "smart" technology presents a worry-free, intuitive on-water experience.

DRESSED TO THRILL

- Along with luxury-car-like drivability, the 1350 delivers elements of stylistic sophistication that make each engine look as good as it runs. For the first time ever, we've hidden the necessary chaos of wires and tubes beneath customizable carbon fiber covers available in 10 paint options. Two of which - SuperSilver Metallic and Bling-Bling Black Metallic - are new to the Mercury Racing array.
- Sleek, sexy, and 100% show ready, these engines will have boaters fighting an internal battle: one side wanting to heat up the docks, the other itching to throttle into open waters.

Features

Horse Power (hp)	1350
